

# Skyler Saleh

Phone: 303-653-7774 | Email: [skylersaleh@gmail.com](mailto:skylersaleh@gmail.com)

## Objective

My goal is to apply my hardware/software background to the development of an advanced computer engineering project. I thrive on collaborative brainstorming, teamwork, peer-to-peer learning, and exploring the unknown.

## Education

University of Colorado, College of Engineering  
Bachelor of Science in Electrical Engineering

GPA: 3.72  
Expected Graduated August 2015

## Work & Research

### **Optical Character Recognition(OCR) on Qualcomm Adreno GPU**

- Investigated the future of GPU Compute.
- Optimized the LOOK OCR Engine (part of Vuforia and SCVE) using OpenCL
- Developed new paradigms to efficiently map the complex pipeline to GPU
- Achieved 10-30x end to end performance gain over existing NEON optimized code
- Collaborated with a team located across the globe to integrate the changes

### **Mobile SLAM**

- Tested alternative solutions for solving the Simultaneous Location and Mapping(SLAM) problem on Mobile Devices
- Designed Mobile GPU oriented computer vision algorithms for the Structure Sensor, and Kinect 3D Cameras
- Lead a team of 4 other researches to build autonomous hexcopters using this technology.
- Focus was to enable large scale dense 3D Scanning and analysis of Natural Environments.
- Competing in Intel Cornell Cup with this Technology

### **Evaluation of multicore & GPU performance in Open Computing Language (OpenCL)**

- Constructed OpenCL kernels based on computer vision and machine learning algorithms to explore variations in performance of architecture pipeline and hardware resource requirements of parallel hardware
- Investigated the performance characteristics, implementation, and structure of OpenCL kernels on field programmable gate arrays (FPGAs) using the Altera OpenCL SDK
- Developed a parallelized multiple-actor, multiple goal, path-finding algorithm using SIMD support and compared tradeoffs with OpenCL implementations.

## Engineering & Software Skills

- Linux development and administration experience
- Software development in C++, Python, Bash, Assembly, Lua, Arduino, Matlab, LaTeX, HTML5, Javascript
- Architecture background in parallel processing on General-Purpose Graphics Processor Units (GPGPU)
- Parallel programming support OpenCL, CUDA
- Assembly coding (RISC and x86), experience with specific support for ARM vectorization and SIMD
- Open Graphics Library (OpenGL/ES) and Open Computer Vision (OpenCV)
- Extensive experience with Mobile GPU architectures (Adreno, PowerVR, Tegra)
- SOC/FPGA-embedded system design using Altera Quartus (Modelsim, OpenCL SDK)
- Hardware design in Verilog and SystemVerilog
- Schematic design and PCB layout in Orcad, Eagle, LT-Spice
- Code sharing with git and perforce version control system
- Programming IDEs: Visual Studio, Eclipse, Xcode, QtCreator and Code::Blocks.
- Programming Language Development using: Yacc, Bison, LLVM

## Work Experience

- Qualcomm (Engineering Intern, GPUCS Team), May 2014 - August 2014
- Argon Software (Founder), Jan. 2010 - Present
- University of Colorado Denver (Undergraduate Research Assistant), May 2013 - Present

## Honors & Affiliations

- Qualcomm Qualstar: Emerald Award
- Undergraduate Research Opportunity Grant recipient
- Tau Beta Pi Member
